directors or otherwise, both as to action in the Indemnified Person's official capacity and as to action in any other capacity while holding such office, and will continue after the Indemnified Person ceases to serve the Corporation as an Indemnified Person.

Section 11. Enforcement. (a) The Indemnified Person's right to indemnification hereunder will be enforceable by the Indemnified Person in any court of competent jurisdiction and will be enforceable notwithstanding that an adverse determination has been made as provided in Paragraph 8 hereof.

(b) In the event that any action is instituted by the Indemnified Person under these Bylaws, the Indemnified Person will be entitled to be paid all court costs and expenses, including reasonable attorneys' fees, incurred by the Indemnified Person with respect to such action, unless the court determines that each of the material assertions made by the Indemnified Person as a basis for such action was not made in good faith or was frivolous.

Section 12. Severability. If any provision of this Article is determined by a court to require the Corporation to perform or to fail to perform an act which is in violation of applicable law, this Article shall be limited or modified in its application to the minimum extent necessary to avoid a violation of law, and, as so limited or modified, this Article shall be enforceable in accordance with its terms.

Section 13. Successor and Assigns. The provisions of this Article will be (a) binding upon all successors and assigns of the Corporation (including any transferee of all or substantially all of its assets) and (b) binding on and inure to the benefit of the heirs, executors, administrators, and other personal representatives of the Indemnified Person.

Amendment. No amendment or termination of this Article will be effective as to an Indemnified Person without the prior written consent of that Indemnified Person and, in any event, will not be effective as to any Covered Act of the Indemnified Person occurring prior to the amendment or termination.

Article XII

AMENDMENTS

The power to alter, amend or repeal the bylaws or to adopt new bylaws will be vested in the Board of Directors by affirmative vote of the directors in the manner provided in these bylaws.

PXLGen™

Finally, you can use superior MicroPress scalable typefaces with your version of TEX.

- Choose from 150+ quality typefaces
- Generate PXL/PK files in seconds
- Font effects: compressed/expanded fonts, shading, outline, smallcaps, and more
- Creates matching TFM files
- As low as $10 per font

Contact MicroPress for pricing and availability for your CPU.

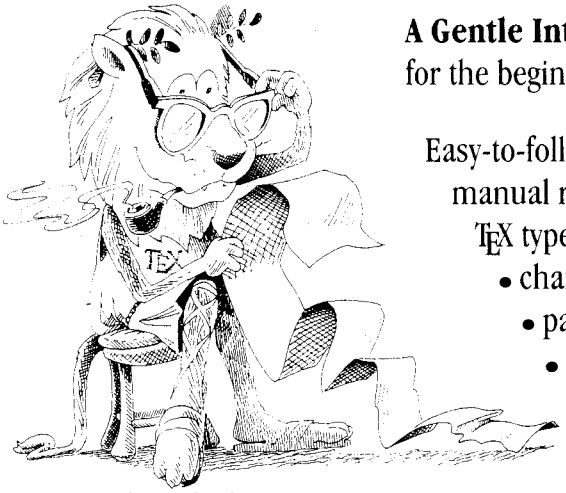
TAME THAT TEX LION!

with

A Gentle Introduction to TEX

A Manual for Self-study by Michael Doob



©Lions, *The TEXbook*, 1986; used by permission of Addison-Wesley Publishing Co.

A Gentle Introduction to TEX is perfect for the beginning TEX user.

Easy-to-follow and straightforward, this 89 page, softbound manual reveals the basics behind TEX typesetting:

- characters and words
- paragraphs and pages
- mathematics
- simple tables
- simple macros

...with dozens of helpful examples and solutions in 11 friendly chapters.

TEX Publishing Services

From the Basic

The American Mathematical Society can offer you a basic TEX publishing service. You provide the DVI file and we will produce typeset pages using an Autologic APS Micro-5 phototypesetter. The low cost is basic too: only $5 per page for the first 100 pages; $2.50 per page for additional pages, with a $30 minimum. Quick turnaround is important to you and us ... a manuscript up to 500 pages can be back in your hands in just one week or less.

To the Complex

As a full service TEX publisher, you can look to the American Mathematical Society as a single source for all your publishing needs.

Macro-Writing	**TEX Problem Solving**	**Autologic Fonts**	**Keyboarding**
Art and Pasteup	**Camera Work**	**Printing**	**Binding**

For more information or to schedule a job, please contact Regina Girouard, American Mathematical Society, P.O. Box 6248, Providence, RI 02940 or call 401-455-4060 or 800-321-4AMS in the continental U.S.

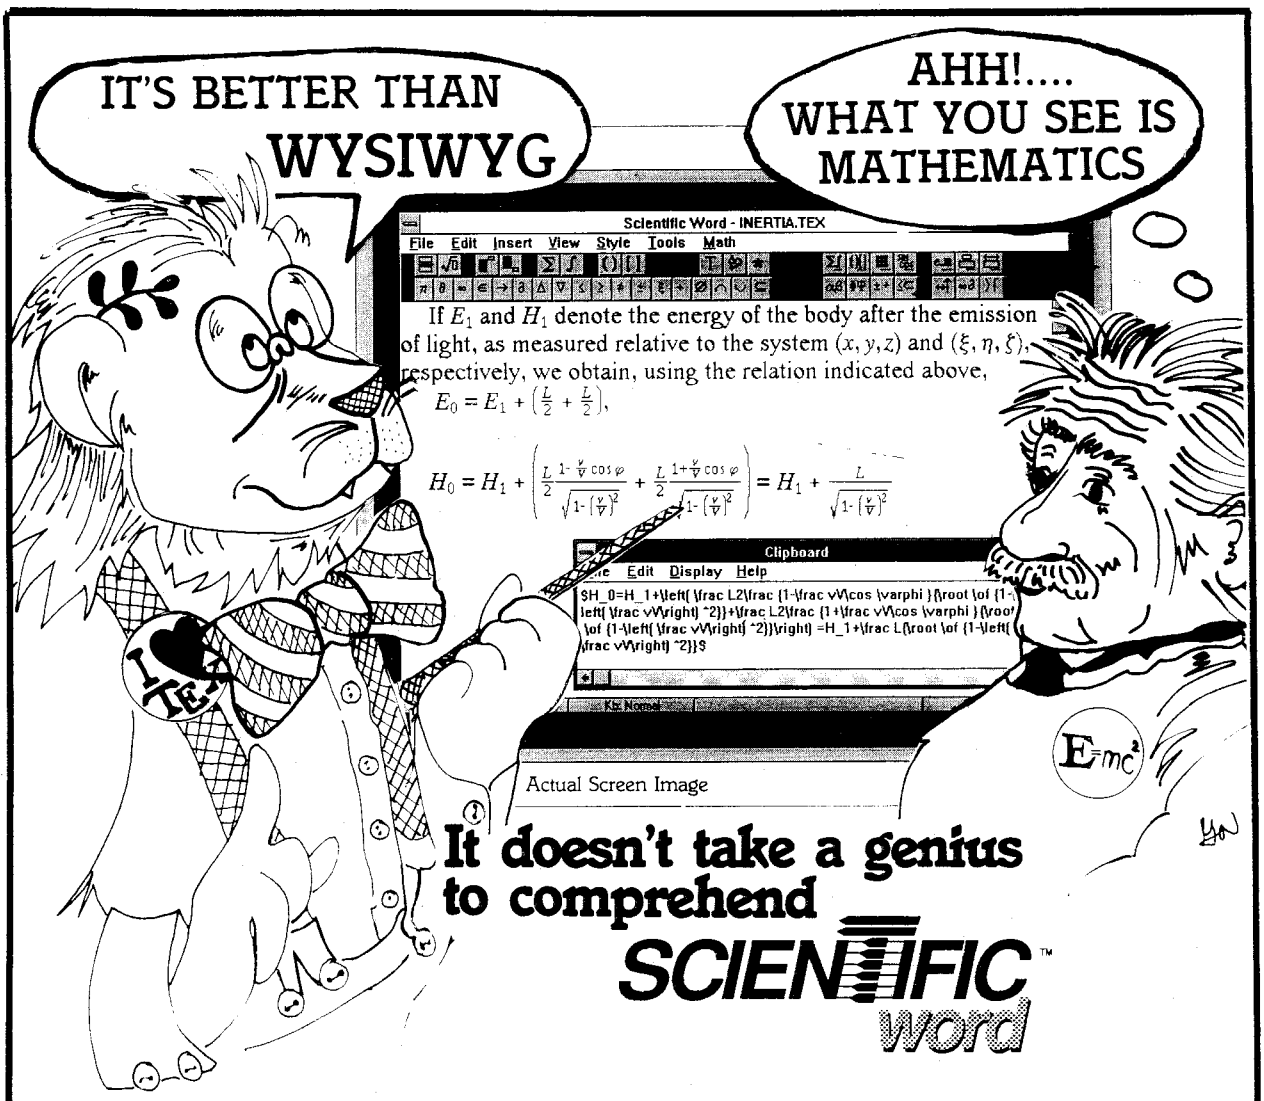
This ad was typeset using PC TEX and the TABLE Macro Package with Bitstream and Computer Modern fonts.



It doesn't take a genius to comprehend

SCIENTIFIC word™

In fact, it's created by the same scientists who brought you T^3tm, TCI Software Research Inc.

Scientific Wordtm is the latest in PC word processing for Windows 3.0.

The file storage format is TEX. It's a full document editor, not a previewer. You compose and edit directly on the screen without being forced to think in TEX.

Your input is mathematics, and your output is TEX.

Discover the genius when you combine the power of TEX with the simplicity of **Scientific Word**tm.

To be a part of this exciting new discovery, contact TCI Software Research Inc. Call today, toll free **1-800-874-2383**, and ask to be put on the list for this summer's special **Scientific Word**tm introductory offer.

TYPESETTING: JUST $2.50 PER PAGE!

Send us your TEX DVI files and we will typeset your material at 2000 dpi on quality photographic paper — $2.50 per page!

Choose from these available fonts: Computer Modern, Bitstream Fontware™, and any METAFONT fonts. (For each METAFONT font used other than Computer Modern, $15 setup is charged. This ad was composed with PCTEX® and Bitstream Dutch (Times Roman) fonts, and printed on RC paper at 2000 dpi with the Chelgraph IBX typesetter.)

And the good news is: just $2.50 per page, $2.25 each for 100+ pages, $2.00 each for 500+ pages! Laser proofs $.50 per page. ($25 minimum on all jobs.)

Call or write today for complete information, sample prints, and our order form. **TYPE 2000, 16 Madrona Avenue, Mill Valley, CA 94941. Phone 415/388-8873.**

TYPE 2000

VECTOR TEX

TEX FOR THE 90'S

Are you still struggling with PXL's, PK's or GF's? Move on to scalable fonts:

- Save megabytes of storage–entire VTEX fits on one floppy.
- Instantly generate any font in any size and in any variation from 5 to 100 points.
- Standard font effects include compression, slant, smallcaps, outline, shading and shadow.
  New: landscape. New: scalable graphics.
- Discover the universe of MicroPress Font Library professional typefaces: not available from any other TEX vender.

List price **$299**

Includes the VTEX typesetter (superset of TEX), 10 scalable typefaces, VVIEW (arbitrary magnification on EGA, CGA, VGA, Hercules, AT&T), VLASER (HP LaserJet), VPOST (PostScript), VDOT (Epson, Panasonic, NEC, Toshiba, Proprinter, Star, DeskJet) and manuals.
S/H add $5. COD add $5.
WordPerfect Interface add $100. Site licenses available.
Dealers' inquiries welcome. Professional typefaces available for older implementations of TEX.

The Joy of TEX

A Gourmet Guide to Typesetting with the AMS-TEX Macro Package, Second Edition

M. D. Spivak

This is the second edition of *The Joy of TEX*, the user-friendly guide to AMS-TEX, which is a software package based on the revolutionary computer typesetting language TEX. AMS-TEX was designed to simplify the typesetting of mathematical quantities, equations, and displays, and to format the output according to any of various preset style specifications. This second edition of *Joy* has been updated to reflect the changes introduced in Version 2.0 of the AMS-TEX macro package.

The first two parts of the manual, "Starters" and "Main Courses," teach the reader how to typeset the kind of text and mathematics one ordinarily encounters. "Sauces and Pickles," the third section, treats more exotic problems and includes a 60-page dictionary on special techniques. The manual also includes descriptions of conventions of mathematical typography to help the novice technical typist. Appendices list handy summaries of frequently used and more esoteric symbols.

This manual will prove useful for technical typists as well as scientists who prepare their own manuscripts. For the novice, exercises sprinkled generously throughout each chapter encourage the reader to sit down at a terminal and learn through experience.

1980 Mathematics Subject Classifications: 00, 68
ISBN 0-8218-2997-1, LC 90-1082

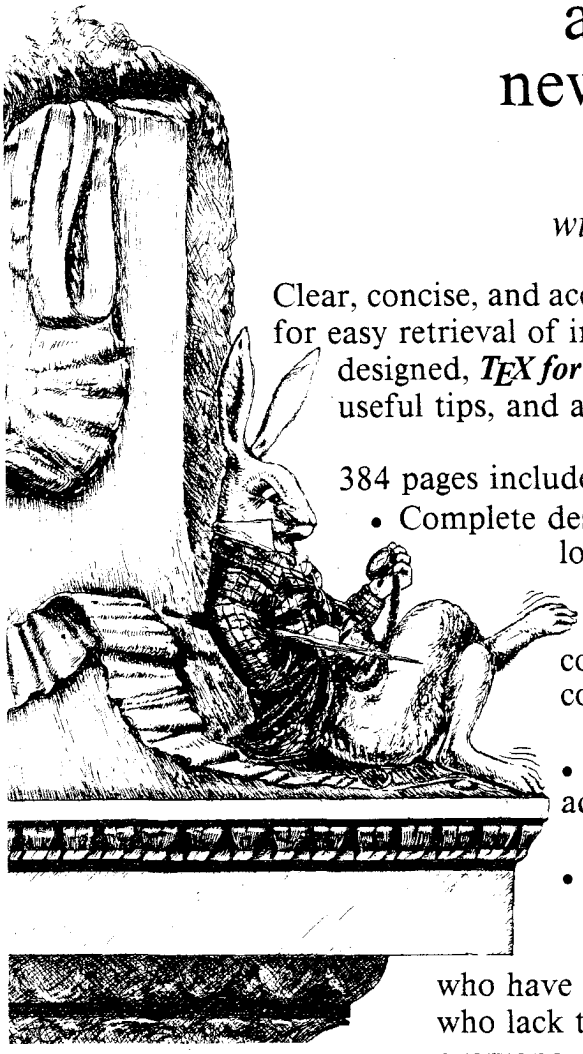
TEX for the Impatient

a practical handbook for new and current TEX users

by Paul W. Abrahams
with Karl Berry and Kathryn A. Hargreaves



Clear, concise, and accessible, this handy reference manual is organized for easy retrieval of information. Thoroughly indexed and carefully designed, ***TEX for the Impatient*** is packed with explicit instructions, useful tips, and a wealth of witty and illuminating illustrations.

384 pages include:

- Complete descriptions of TEX commands, arranged for lookup either by function or alphabetically
- Clear definitions of essential TEX concepts, collected in a separate chapter so that the command descriptions remain brief and accessible
- Explanations of common error messages and advice on solving problems that frequently arise
- A collection of useful macros

TEX for the Impatient is for busy people who have discovered the unmatched benefits of TEX, but who lack the time to master its intricacies. It is for everyone—new user to expert—who needs a quick reference guide to TEX.

DVIPSONE™

The converter that produces resolution-independent PostScript output using outline fonts.

Now you can *really* exploit outline font technology in TEX...

A DVI-to-PS converter that uses outline fonts makes it possible to use fonts other than Computer Modern—and to use Computer Modern fonts in unusual sizes and orientations.

It is, of course, always possible to 'permanently' download outline fonts to a PostScript printer and then treat these fonts as if they were printer resident. Trouble is, typical outline fonts take over 50 kbytes of printer memory, and so only a handful can be loaded at a time. And this means that very many DVI files cannot be printed, since it is not uncommon for a DVI file to call for 30 or more fonts.

...without running out of printer memory,

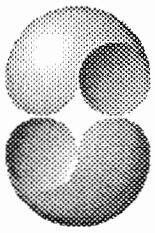
DVIPSONE's advanced font management techniques make it possible to use outline fonts as efficiently as one can use bitmapped fonts with older DVI-to-PS converters.

Disks no longer have to be cluttered up with those huge high-resolution bitmap font files. It is also no longer necessary to reconvert from DVI to PS format every time an output device of different resolution is used. The very same PostScript file used for proofing on a laser printer can be sent to a high resolution image setter. This greatly reduces the chance of 'surprises' when the final copy is run off.

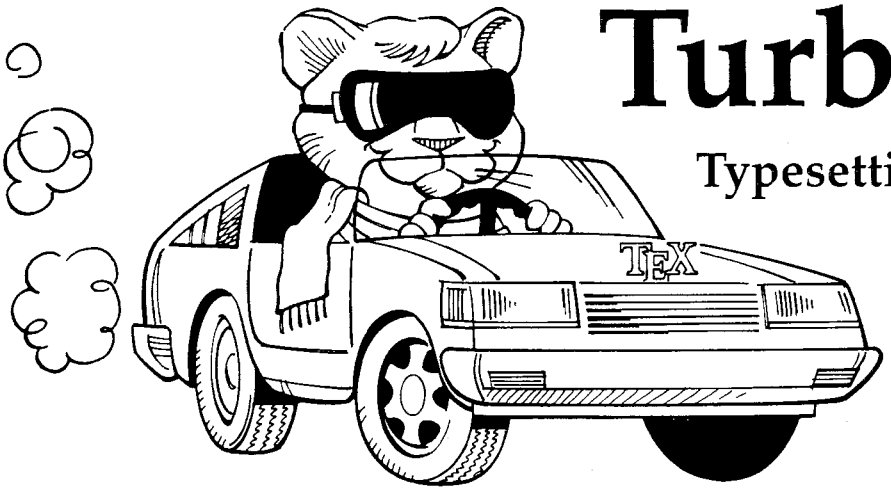
...while enjoying considerable cost savings.

Many service bureaus will image resolution-independent PostScript files for a little over $2 per page, while it can cost as much as four times that for someone knowledgeable about TEX to process DVI files.

DVIPSONE™ *runs on IBM PC compatibles and can use any Adobe Type 1 outline font, including printer resident fonts, Computer Modern outline fonts, as well as any of the over 7,000 Type 1 fonts available from 30 vendors, including more than 1,000 in the Adobe Type Library alone.*



Y&Y, 106 Indian Hill, Carlisle, MA 01741 USA (508) 371-3286



TurboTEX

Typesetting Software

Executables $150
With Source $300

Now Windows Compatible!

NOW YOU CAN run the TEX typesetting system in the powerful and convenient graphical environment of Microsoft Windows, with the new Windows-compatible TurboTEX Release 3.1.

TurboTEX brings you the latest TEX 3.1 and METAFONT 2.7 standards and certifications: preloaded plain TEX, LATEX, AMS-TEX and AMS-LATEX, METAFONT, preview for EGA/VGA displays, Computer Modern and LATEX fonts, and printer drivers for HP LaserJet and DeskJet, PostScript, and Epson LQ and FX dot-matrix printers. This wealth of software runs on your IBM PC (MS-DOS, Windows, or OS/2), UNIX, or VAX/VMS system.

■ **Best-selling Value:** TurboTEX sets the standard for power and value among TEX implementations: one price buys a complete, commercially-hardened typesetting system. *Computer* magazine recommended it as "the version of TEX to have," *IEEE Software* called it "industrial strength," and thousands of satisfied users worldwide agree.

TurboTEX gets you started quickly, installing itself automatically under MS-DOS or Microsoft Windows, and compiling itself automatically under UNIX. The 90-page User's Guide includes generous examples and a full index, and leads you step-by-step through installing and using TEX and METAFONT.

■ **Classic TEX for Windows.** Even if you have never used Windows on your PC, the speed and power of TurboTEX will convince you of the benefits. While the TEX command-line options and *TEXbook* interaction work the same, you also can control TEX using friendly icons, menus, and dialog boxes. Windows protected mode frees you from MS-DOS limitations like DOS extenders, overlay swapping, and scarce memory. You can run long TEX formatting or printing jobs in the background while using other programs in the foreground.

■ **MS-DOS Power, Too:** TurboTEX still includes the plain MS-DOS programs. Even without expanded memory hardware, our virtual memory simulation provides the same sized TEX that runs on multi-megabyte mainframes, with capacity for large documents, complicated formats, and demanding macro packages.

■ **Source Code:** The portable C source to TurboTEX consists of over 100,000 lines of generously commented TEX, TurboTEX, METAFONT, previewer, and printer driver source code, including: our WEB system in C; PASCHAL, our proprietary Pascal-to-C translator; Windows menus and text-mode interface library; and preloading, virtual memory, and graphics code, all meeting C portability standards like ANSI and K&R.

■ **Availability & Requirements:** TurboTEX executables for IBM PC's include the User's Guide and require 640K, hard disk, and MS-DOS 3.0 or later. Windows extensions require Microsoft Windows 3.0. Order source code (includes Programmer's Guide) for other machines. On the PC, source compiles with Microsoft C 5.0 or later (and Windows SDK for Windows extensions), Watcom C 8.0, or Borland C++ 2.0; other operating systems need a 32-bit C compiler supporting UNIX standard I/O. Media is 360K 5-1/4" or 720K 3-1/2" PC floppy disks (please specify).

■ **Upgrade at Low Cost.** If you have TurboTEX Release 3.0, upgrade to the latest version for just $40 (executables) or $80 (including source). Or, get either applicable upgrade free when you buy the AP-TEX fonts (see facing page) for $200!

■ **No-risk trial offer:** Examine the documentation and run the PC TurboTEX for 10 days. If you are not satisfied, return it for a 100% refund or credit. (Offer applies to PC executables only.)

■ **Free Buyer's Guide:** Ask for the free, 70-page Buyer's Guide for details on TurboTEX and dozens of TEX-related products: previewers, TEX-to-FAX and TEX-to-Ventura/Pagemaker translators, optional fonts, graphics editors, public domain TEX accessory software, books and reports.

Ordering TurboTEX

Ordering TurboTEX is easy and delivery is fast, by phone, FAX, or mail. Terms: Check with order (free media and ground shipping in US), VISA, Mastercard (free media, shipping extra); Net 30 to well-rated firms and public agencies (shipping and media extra). Discounts available for quantities or resale. International orders gladly expedited via Air or Express Mail.

AP-TEX Fonts

TEX-compatible Bit-Mapped Fonts Identical to Adobe PostScript Typefaces

If you are hungry for new TEX fonts, here is a feast guaranteed to satisfy the biggest appetite! The AP-TEX fonts serve you a banquet of gourmet delights: 438 fonts covering 18 sizes of 35 styles, at a total price of $200. The AP-TEX fonts consist of PK and TFM files which are exact TEX-compatible equivalents (including "hinted" pixels) to the popular PostScript name-brand fonts shown at the right. Since they are directly compatible with any standard TEX implementation (including kerning and ligatures), you don't have to be a TEX expert to install or use them.

When ordering, specify resolution of 300 dpi (for laser printers), 180 dpi (for 24-pin dot matrix printers), or 118 dpi (for previewers). Each set is on ten 360 KB 5-1/4" PC floppy disks. The $200 price applies to the first set you order; order additional sets at other resolutions for $60 each. A 30-page user's guide fully explains how to install and use the fonts. Sizes included are 5, 6, 7, 8, 9, 10, 11, 12, 14.4, 17.3, 20.7, and 24.9 points; headline styles (equivalent to Times Roman, Helvetica, and Palatino, all in bold) also include sizes 29.9, 35.8, 43.0, 51.6, 61.9, and 74.3 points.

For TEX Users....

New Services and Prices from Computer Composition Corporation

We are pleased to announce the installation of several ***new output services*** now available to TEX users:

1. High Resolution Laser Imaging (1200 dpi) from *Postscript diskette files* created on either Mac- or PC-based systems.
2. High Resolution Laser Imaging (960 dpi) from *DVI magnetic tape or diskette files* using a variety of typefaces in addition to the Computer Modern typeface family.
3. High quality laser page proofs at 480 dpi.
4. **NEW PRICING** for high resolution laser imaging:
   a. From **Postscript text files** in volumes over 400 pages .... **$2.00 per page**
   b. From **Postscript text files** in volumes between 100 & 400 pages ..... **$2.25 per page**
   c. From **Postscript text files** in volumes below 100 pages .. **$2.40 per page**
   d. From **DVI files** in volumes over 400 pages ..... **$2.15 per page**
   e. From **DVI files** in volumes between 100 & 400 pages ..... **$2.30 per page**
   f. From **DVI files** in volumes below 100 pages ..... **$2.45 per page**

   NOTE: DEDUCT $1.00 FROM THE ABOVE PRICES FOR HIGH QUALITY LASER PAGE PROOFS.
5. **All jobs shipped within 48 hours.**

Call or write for page samples or send us your file and we will image it on the output unit of your choice.

Public Domain TEX

The public domain versions of TEX software are available from *Maria Code - Data Processing Services* by special arrangement with Stanford University and other contributing universities. The standard distribution tape contains the source of TEX and METAFONT, the macro libraries for AMS-TEX, LATEX, SliTEX and HP TEX, sample device drivers for a Versetec and LN03 printers, documentation files, and many useful tools.

Since these are in the public domain, they may be used and copied without royalty concerns. A portion of your tape cost is used to support development at Stanford University.

Compiled versions of TEX are available for DEC VAX/VMS, IBM CMS, IBM MVS and DEC TOPS systems. Systems using a standard format must compile TEX with a Pascal compiler.

TEX Order Form

TEX Distribution tapes:

____ Standard ASCII format
____ Standard EBCDIC format
____ Special VAX/VMS format Backup
____ Special DEC 20/TOPS 20 Dumper format
____ Special IBM VM/CMS format
____ Special IBM MVS format

Font Library Tapes (GF files)

____ 300 dpi VAX/VMS format
____ 300 dpi generic format
____ IBM 3820/3812 MVS format
____ IBM 3800 CMS format
____ IBM 4250 CMS format
____ IBM 3820/3812 CMS format

Tape prices: $92.00 for first tape, $72.00 for each additional tape. Postage: allow 2 lbs. for each tape.

Documents:	Price $	Weight	Quantity

Send your order to: Maria Code, DP Services, 1371 Sydney Drive, Sunnyvale, CA 94087
FAX: 415-948-9388 Tel.: 408-735-8006.

Finally . . .

. . . a complete TEX solution that implements all the new TEX 3.0 capabilities, virtual fonts, and the Extended Font standard adopted at the TUG '90 meeting in Cork.

ArborText put it all together. You don't have to!

TEX 3.0 komplett. Die ArborText-Lösung.
ArborText a tout préparé pour vous. Profitez-en!
ArborText opracował wszystko. Wy nie musicie!

ArborText's TEX 3.14 provides everything you need in a complete, ready-to-use package:

- Utilize the Extended TEX Font Encoding capability with pre-built virtual fonts for Computer Modern and PostScript
- Use the conversion utilities we supply to make your own extended fonts from existing TEX 2.0 style fonts
- Easily accent characters from your foreign language keyboard
- Create multi-language documents
- Choose from included hyphenation patterns for English, French, German, Dutch, Spanish, Portuguese, or add your own
- Use the extended version of Plain TEX and LATEX
- We've provided access to the New Extended Fonts directly—***macro source included!***

TEX 3.14 and support software is available for Sun, Apollo, DEC/Risc-Ultrix, IBM PCs, HP 9000 Series 300 & 400.

Coming Soon: TEX 3.14 for IBM RS/6000, Silicon Graphics, HP 9000 Series 700 & 800.

TEX USERS GROUP

Public Domain TEXware

Now available through the TEX Users Group

This collection has been compiled over the past several years by Jon Radel and will continue to be updated by him in the future. It contains a wide variety of TEX and TEX-related programs including: front ends and editing tools, graphics support, drivers, fonts, style files and macros, and programming tools. It also contains *A Gentle Introduction to TEX* by Michael Doob, as well as compilations of various electronic TEX digests from around the world.

VALUABLE ADDITIONS TO YOUR TEX TOOLBOX

CAPTURE
Capture graphics generated by CAD, circuit design, data plotters, and other application programs that support the LaserJet. Make LaserJet images compatible with TEX. Create `pk` files from `pcl` or `pcx` files. $115.00

texpic
With texpic graphics package, you have the tools to integrate simple graphics—boxes, circles, ellipses, lines, arrows—into your TEX documents. Maintains output device independence. $79.00

Voyager
Macros to produce viewgraphs quickly and easily using TEX. They provide format, indentation, font, and spacing control. Macros included to produce vertical and horizontal bar charts. $25.00

Micro Programs Inc. 251 Jackson Ave. Syosset, NY 11791 (516) 921-1351

SPRINGER FOR TEX

A Beginner's Book of TEX

Raymond Seroul, Universite Louis Pasteur, Strasbourg, France;
Silvio Levy, Princeton, New Jersey

Many other TEX books are simply manuals. This book is a friendly introduction to TEX, the powerful typesetting system by Don Knuth. It is addressed primarily to beginners, but it contains much information that will be useful to aspiring TEX wizards. Moreover, the authors kept firmly in mind the diversity of backgrounds that characterizes TEX users: authors in the sciences and in the humanities, secretaries, and technical typists.

The book contains a careful explanation of all the fundamental concepts and commands, but also a wealth of commented examples and "tricks" based on the authors' long experience with TEX. The attentive reader will quickly be able to create a table, or customize the appearance of the page, or code even the most complicated formula. The last third of the book is devoted to a Dictionary/Index, summarizing all the material the text and going into greater depth in many areas.

1991/283 pp./Softcover $29.95/ISBN 0-387-97562-4

Chapter 1: What is TEX ?
Chapter 2: The characters of TEX
Chapter 3: Groups and Modes
Chapter 4: The Fonts TEX uses
Chapter 5: Spacing, glue and springs
Chapter 6: Paragraphs
Chapter 7: Page Layout
Chapter 8: Boxes
Chapter 9: Alignements
Chapter 10: Tabbing
Chapter 11: Typesetting Mathematics
Chapter 12: TEX Programming
Chapter 13: Dictionary and Index
